COMPACTUS MOBILE FILING STORAGE

MECHANICAL MOBILE COMPACTUS STORAGE

SPECIFICATIONS

MATERIAL	Cold Rolled Carbon Steel (JIS G3141 SPCC – SD) & Enamel Finish for long lasting lifespan.
PRE-TREATMENT PROCESS	7 stages pre-treatment process.
POWDER COATING PROCESS	The intensity of the spray will be around 50 micron to 80 micron to be sprayed to every furniture component. On baking side, the sprayed powdered furniture will be heated up to above 200 degree Celsius to allow the powder to stick firmly to the metal component.
BODY & SHELF THICKNESS	0.8mm steel thickness after powder coated application.
BASE & TRACK THICKNESS	2mm thickness for the Base & for track itself, there is solid steel with 19mm thickness for the wheel to move forward & backward. Added info – solid steel for track dimension is 32mm (W) x 19mm(H)
PLATFORM	1mm PVC laminated particle board with rough surface to prevent skid. All particle board for platform is laminated fully in all sides.
BASE LOADING WEIGHT	Ability to hold 1000kg per bay.
